**10 FOR \$20**

## ***Our SALE ends soon- beautiful plants added daily***

Welcome to our April Newsletter. On the nursery, we have been very busy doing the autumn potting and tubing cuttings for plants that will be available for sale in November. We have also been thrilled with our SALE which runs until April 28th- new stock is added daily so there are always great plants to choose from. We have also been very pleased to see good levels of rain and warm temperatures over the past month- this has kept the crops looking fresh and has encouraged more growth. This month we have a new crop of *Bergenia Wanaka Wine* with beautiful large leaves starting to change to their burgundy red winter colours. These are great mass planted under trees and as edging along paths to make any easy-care garden. The crops of *Cornus Greenvale* have grown very well and our largest grade, in a 25-litre grade even have flower buds showing for spring. With the moisture in the ground, now is the time to start planting trees so they get their roots down over autumn and winter ready for maximum spring growth. The *Echinacea Powwow White* are flowering now and have many more buds to open. They grow well in a sunny garden and can handle a dryer site making them a versatile landscape plant. The *Francoa* plants have many flowers on them now and will continue to flower until the heavy frosts of winter. The *Rhododendron* crop has grown well with the larger grades developing many flower buds. This year we also have a smaller grade available in a 2.5 litre pot and these have grown into bushy little plants. *Rhododendron Karen Triplett* is still one of our best picks as the leaves and flowers always stand out in any garden. The new growth is a lovely bronze and the flower heads are large soft yellow making for a stunning display in spring. We have my grandfather's *Scabiosa caucasica Blue Mountain* available again this year after a few years of building up the stock of this deep powder blue form. It can be used for cut flowers as well as a great summer display in the perennial garden.

### **Bergenia Wanaka Wine**

A Pat Stuart selection with lovely burgundy leaves in winter, tall heads of large bright rose pink flowers in early spring. Makes great ground cover in light shade and drought tolerant.

[More info.](#)

### **Leucothoe Crimson Globe**

Beetroot red to bronze winter colouring with racemes of white lily of the valley like flowers in November. A neat compact plant for acid soils. A Blue Mountain selection and introduction. Ht. 75cm. Evergreen.

[More info.](#)

### **Acer Brandywine**

Beautiful autumn colour starting with a wine burgundy colour through to red and orange shades until the entire tree is covered in a fiery orange blaze colour. Brandy Wine grows best in a slightly sheltered site with acid soils but it can handle most moist soil types from silt to light clay. This is a male form that will not set seed and therefore there no chance of spreading in the wild. It has been used as a specimen tree in lawns and as street plantings as well as a shade tree in residential sections.

[More info.](#)

### **Scabiosa caucasica Blue Mountain**

Easily grown perennial for a sunny open garden. Bright blue flowers which can be cut for flower arranging. Height 50cm.

[More info.](#)

## Francoa app. White Bouquet

Bridal Flower. Large evergreen perennial with green furry compound leaves, large white flowers open from blush pink buds on 75cm spikes.

[More info.](#)

## Pseudowintera colorata Burgundy Delight

Aromatic green foliage, lime yellow in spring and then blotched red and deep plum purple through winter. A native for any garden. Ht 1m. Evergreen.

[More info.](#)

## Malus Blue Mountain

Bright pink flowers in late spring on a hardy tall upright tree. Leaves red in summer. Edible fruits in autumn are ideal for making jelly. Ht. 3-4m. Deciduous.

[More info.](#)

## Rhododendron Karen Triplett

Large wide funnel shaped yellow flowers that glow in the light in early November. The bush of deep green foliage is an attractive copper when making new growth. Ht 1.5m.
