

**Malus Flamingo**

# Wholesale Indent Catalogue 2017

Dear Clients & Friends

Happy New Year! Welcome to our 85<sup>th</sup> catalogue. We have done our catalogue on CD once again. When you put the CD into your computer you will see both a black and white and colour catalogue available as pdf files. You will require a computer with a pdf reader installed (most will already have this) such as "Adobe" (<http://get.adobe.com/reader/>) that can be downloaded from the web for free. If you have any problems with viewing the catalogue let us know so we can make other arrangements for you to access the catalogue. The catalogue is also available on our wholesale website at [www.bmn.co.nz](http://www.bmn.co.nz)

We are always introducing new varieties that are always very popular and sell out quickly. We have more new lines available this year, so order early so as to not miss out. We are always adding to our range from New Zealand and overseas.

Some of the interesting lines from this year's catalogue come from a wide range of plants including perennials, shrubs and trees. This shows the wide range of plants that we enjoy growing for you and your customers.

From an increasing range of perennials, this year we are releasing a fantastic new *Bergenia* called Wanaka Wine that forms a strong rounded clump with deep burgundy wine coloured leaves during late summer and over winter. The flowers are deep fluorescent pink and glow in the evening light during late winter and spring.

We also have *Aconitum cammarum* Bicolor available with its lovely blue and cream flowers that put on a stunning display in spring and early summer. *Primula jap.* Appleblossom flowered last winter and I was very impressed with the number of flowers and the soft pink colour that contrasted well against the deeper coloured japonicas. *Echinacea purpurea* Doubledecker is a very interesting new *Echinacea* that has flowers on top of each other giving rise to its name. These were first developed in Germany a few years ago.

The *Meconopsis* are stunning with glowing blue flowers and as the name suggests, the Himalayan blue poppy hails from Himalaya.

A plant that is very rare and most exciting is the *Podophyllum Kaleidoscope* and Spotty Dotty or Mayapple. These have large leaves with distinctive dark spots on the upper surface. We first released them last year and they are proving to be very popular. They have deep burgundy red flowers that hang under the leaves in late spring and early summer. It grows best in a shaded area similar to where hostas grow.

A selection of our trees and shrubs that are looking great this year include our very popular *Cornus Greenvale*. It covers itself in large white flowers in late spring and this year's was still in flower for Christmas. As the flowers age they go a lovely pink colour contrasting well with the green foliage.

This year we are very excited to have the first plants available of *Pseudowintera Lime Light* after developing this plant over the past 15 years we now have enough to start selling it. The soft lime green/gold leaved contrast well with the soft red spots to the leaves during winter. It forms a neat rounded plant growing to about 50cm in 10 years. It can be grown as a low hedge or as a feature plant in a garden border.

The *leucothoe* f. *Crimson Globe* have sold well this year and are putting on fantastic deep burgundy colour as the summer heat continues. The rounded form make a good container plant for a shaded area. *Malus Flamingo* has proven to be a very good feature tree with its deep red leaves and upright habit making it suitable for the smaller gardens and sections in the modern subdivisions. The double deep pink flowers are a real show stopper in early spring.

Rhododendrons have always been popular and with the redevelopment of gardens in Christchurch they have been selling very well. Our 2017 crops of Rhododendrons are looking great having already made one flush of growth and some starting on their second flush, making a bushy well rounded plant. Most varieties are forming flower buds beautifully and will be ready for lifting and potting from March - April. We anticipate having some plants available from mid April with others coming on stream in May. We have included a selection guide for the Rhododendrons showing their colour, height and flowering times. We are also very happy to put together a range that will suit your area and growing conditions -all you need to do is give us an idea of numbers. Again, some varieties listed are in short supply so I encourage you to order and take receipt of your order early as all orders will be supplied on a first in basis.

All our prices are freight free **on orders over \$500.00 (excluding GST) paid by the 20<sup>th</sup> of the month following deliver**. This works well for our customers as they know exactly how much their plants will cost.

Also to help our well organized, loyal indent customers, we are offering a **5% discount on orders dispatched during the months of April, May, June, and July for consignments over \$500.00 and paid by the 20<sup>th</sup> of the month following delivery**. In the past this has encouraged customers to have stock earlier and many have sold these plants and needed more stock. It also spreads our dispatch load making the spring dispatch more manageable.

We grow an exciting and wide range of plants but we don't grow all of these in wholesale numbers. We encourage you to draw on our stocks of these lines to fill your retail orders and to take advantage of our special discount during the months of April, May, June and July.

If you have any questions, would like to know about availability or require information about a particular variety please feel free to contact us.

Have a look at our new website at [www.bmn.co.nz](http://www.bmn.co.nz) . The password to get wholesale pricing is tree14 - simply click on login at the top right hand side of the home page and then click on "are you a Wholesaler" and enter the password. Our Indent list is also available on the website.

Kind regards from the Blue Mountain Team

Denis, Chris and Rebecca Hughes

<b>BETULA</b>				
Indispensable, easy to grow trees. Very tough and hardy, making specimens very quickly. As trees go, they are quite short lived, having a life span about the same length as humans. Great for shade, shelter, autumn colour, ornamental trunks, dainty weeping foliage and some with coloured foliage. When senescence is reached they make very ornamental wood piles, before burning very brightly on the winter fire.				
<b>Betula maximowicziana</b> The largest leaved Birch. Truck orange brown hardy quick growing round headed tree. Yellow autumn foliage. Ht 4m. Deciduous	BETU MAX 6	140	6	C

<b>HOHERIA</b>				<b>Ribbonwood or lacebark</b>
<b>Hoheria sexstylosa</b> Grey green leaves all year. white flowers in summer. Hardy. Ht. 3m. Evergreen.	HOHE SEX 175	100	175	C
<b>HOSTA</b>				<b>Plantain Lily</b>
A tough hardy group of popular herbaceous perennials. All grow well in good moist well drained soils with light shade. Most have relatively small juvenile leaves when first planted but after several years develop handsome bold foliage through summer with spikes of attractive summer flowers. They form great ground covers for shaded borders (south side of buildings) or under trees, making for an easy care garden. There is a huge range of size and colour foliage no wonder in recent years there has been a great upsurge in their use and many new forms have been introduced.				
<b>Hosta Blue Cadet</b> Blue leaved hosta for a shaded garden or container.	HOST BLUC 175	10	175	C

<b>HYDRANGEA</b>				
A rewarding group of shrubs at their best when most others have finished for the year. The very popular H.macrophylla (H. hortensia) has very attractive heads of flowers from mid summer to autumn. They are divided into two groups - those with mop heads (round ball heads of flowers), and lacecaps (a flat head of flowers with the spectacular large flowers as a ring around the edge of the head) The flower colour may be: creamy white, pink - red, or pale blue - deep violet blue. It is most unusual in that pink or blue flowers are controlled by the availability of aluminium in the soil. Acid soils and aluminium sulphate gives blue flowers. Sweet, alkaline soils and no aluminium gives pink - red flowers. Flower size may also be dramatically improved by a good, well drained moist fertile soil, giving the best results. Pruning should be done each year in the spring and restricted to removing dead and weak wood right out at the base of the plant. Also some thinning maybe necessary to allow room for new water shoots to come through from the base each year. Do not trim the top back, as the flowerbuds were formed the previous summer/autumn. H.macrophylla should be protected from the worst of the winter frosts, this is why the deadheads should be retained until spring. I find the H.arborescens and H.paniculata forms much tougher to winter cold. They may be pruned in late winter or very early spring, as flower buds do not form until this time.				
<b>Hydrangea arborescens Annabell</b> White heads of flowers in late summer to autumn. Best in some shade. Ht.1.5m. Deciduous.	HYDR ANN 175	80	175	C
<b>Hydrangea macrophylla Blaumeise</b> Outstanding Lacecap with the best deep blue flowers. Ht. 90cm	HYDR BLA 6	50	6	C

<b>Phyteuma</b>				
<b>Phyteuma scheuchzeri</b> Deep blue bell shaped flowers. A delightful rare relative of the campanula. Leaves are bright-green, heart-shaped. Ht 20cm	PHYT SCH 140	New 17	140	C
<b>PICEA</b>				
<b>Picea orientalis</b> A tall conical tree for shelter or as a specimen in the garden. Very hardy conifer. Ht. 5m. Evergreen.	PICE ORI 175	30	175	C Oriental Spruce
<b>Picea smithiana</b> Beautiful conifer with pendulous foliage of long green needles on branches upturned at the tips. Ht 5m. Evergreen.	PICE SMI 175	60	175	C Western Himalayan Spruce
<b>Pieris</b>				
Lily of the Valley Bush				
This close relative of the Rhododendron requires the same conditions, and is used in the landscape in the same way. However the panicals of mainly white flowers are very distinct, and very ornamental as is the foliage, especially when in full new growth in the late spring. As with rhodos it is important to deadhead after flowering. I leave this until early November when all fear of frost is over. This delays the vulnerable new growth. To control weeds near the plants, mulch with pea straw/peat and bark mix/pine duff. This feeds the plant and keeps the roots cool and moist.				
<b>Pieris Flaming Silver</b> Brilliant red new growths turning green with a silver edge in summer. White flowers in spring. Ht. 1.25m. Evergreen.	PIER FLA 175	25	175	C Lily of the Valley Bush
<b>Pieris forrestii Wakehurst</b> Bright red new growths in spring and large panicles of large white flowers in spring make this a must for the woodland garden. Ht 2m. Evergreen.	PIER LOR 175	30	175	C Lily of the Valley Bush

A medium tree with a short trunk and wide spreading head. Deeply lobed leaves turn crimson in autumn. Ht. 5m. Deciduous.	QUER ELL 25	1.5	25	C

<b>Quercus rubra</b>				Scarlet Oak
A large tree with glistening green leaves in summer turning magnificent red in autumn. One of the finest trees for autumn colour. Ht 5m. Deciduous.	QUER RUB 25	2.0	25	C

## Rhododendron

Rhododendrons are indispensable for spring colour in any garden. There is a huge range of colours, sizes and shapes to choose from. They all prefer an acid free draining organic moist soil. In a position sheltered from the worst wind and hottest sun. I find they do best in a mixed boarder with a few trees dotted through e.g.. Maples magnolias, apples or dogwoods which contrast nicely.

Stock Name	Stock Code	Grade	Cont	Label
<b>Rhodo Albert Schweitzer</b> A large shrub of upright habit with large conical trusses of rose-Bengal flowers with a deeper red blotch in Nov. Ht 1.5m	RHOD ALBS OG	40	250	C

## TERMS OF TRADE

This catalogue cancels all previous catalogues.

**“Freight Free in Store” south island wide on orders over \$500.00 (Excluding GST) paid by the 20<sup>th</sup> of the month following delivery. All other orders will have freight charged at cost.**

**5% discount will apply on orders dispatched during the months of April, May, June, and July for consignments over \$500.00 and paid by the 20<sup>th</sup> of the month following delivery.**

GST is extra, and prices are subject to alteration without notice.

Minimum quantity supplied in any one variety is 3 plants. Orders of less than minimum numbers per variety will be charged at a premium rate of 50 cents extra per plant.

Most plants are ready for dispatch in April. Orders placed will be supplied on a first come first served basis subject to shortages caused by conditions beyond our control.

Payment for plants supplied shall be due and payable on the 20th of the month following delivery.

A late penalty payment at the rate of 2% per month shall accrue on any amount outstanding from the due date until the date of payment. All costs incurred in the collection on any outstanding accounts shall be payable by the account holder.

All plants supplied shall remain the property of Blue Mountain Nurseries until payment for the entire order is made in full (including GST, any freight charge and collection costs).

Blue Mountain Nurseries take care to have all plants sold by them to be true to name and description, to the best of their knowledge, but any express or implied condition, statement or warranty, arising by statute or common law or otherwise, as to growth, description, quality or productiveness, is hereby excluded and Blue Mountain Nurseries will not undertake to replace failures or be responsible for the plants supplied.

Blue Mountain Nurseries shall not be liable for any loss, damage or deterioration to the goods during delivery to the purchaser that causes loss or damage to the purchaser. Any goods damaged during delivery must be notified to the last carrier immediately and to Blue Mountain Nurseries within 5 working days of the goods arrival for a credit to be given.

Blue Mountain Nurseries shall not be liable for any loss caused by late delivery of the plants because of crop failure, disease, Government or local authority regulation or order, Act of God, or Negligence of the Supplier and its servants.
